. .master stanby" "ETS 3 Professional is the version ETS for any person trained or experienced as KNX integrator. It is the successor of STDs 2. ETS Professional is ideal for the . . .master stanby" The layout file can be used to create the ETS 3 Professional. Installation of KONE eautomation ETS 3 Professional We also can install the eautomation ETS 3 Professional in the KONE mobile system. Our visit is created as a short animation, which explains the functionality of the program. The animation is created for KONE Trainers, for the necessary training courses to operate the KONE Trainers. The animation is divided into four parts: Part 1: Order and order data This part of the animation shows how you can enter an order with an order number, contact, quantity, ticketing time, shipping time and invoice date into the system. Part 2: Order processing This part of the animation shows how the order processing (ordering, ordering changes and cancellation) takes place in KONE Trainers and

Mobile Elements. Part 3: Order picking This part of the animation shows how the order is picked and forwarded to the warehouse. Part 4: Delivery and dispatch This part of the animation shows how the delivery and dispatch takes place at the warehouse. Utilities All the utilities of the KONE Trainers are also included in the mobile element. The utilities that are installed in the mobile element are: Log entries The log entries of the KONE Trainers are identical with those of the KONE mobile element. Product support The product support of the KONE Trainers is identical with that of the KONE mobile element. The product support is installed in the mobile element. Trainer guide The trainer guide of the KONE Trainers is identical with 82157476af
